CTH XX (Bellevue Street) Construction Project Handout

The Brown County Highway Department will be completing a reconditioning project on CTH XX (Bellevue Street) from CTH O (Allouez Avenue) to the railroad tracks located 300 feet south of Industrial Drive. This work consists of repairing curb and gutter, removing the existing pavement, repairing poor subgrade areas, and placing new pavement.

**Project Schedule:**

Work on this project is scheduled to begin on Monday, April 11, 2022, and is expected to be completed by the end of August. The schedule is weather-dependent and may change due to weather conditions.

**Traffic and Access:**

Access to all businesses and residences will be maintained during construction. For properties with two or more driveways, one of the driveways will always remain open.

Repairs to the concrete curb and gutter will take place first. There will be lane closures during this time; however, the roadway will remain open to traffic in both directions. Curb and gutter repair is anticipated to take approximately four weeks.

After the concrete curb and gutter repair is completed, the paving operations will begin. Paving operations will take place in 2 stages. Some minor access delays can be expected while work is taking place at the end of your driveway.

**Stage 1: Verlin Road to Railroad Tracks:**
The roadway will remain open to southbound traffic only. Northbound traffic will be detoured using CTH O (Allouez Avenue), CTH V (Lime Kiln Road) and Mason Street. This stage is anticipated to take approximately eight weeks.

**Stage 2: CTH O (Allouez Avenue) to Verlin Road:**
The roadway will remain open to southbound traffic only. Northbound traffic will be detoured using CTH O (Allouez Avenue), CTH V (Lime Kiln Road) and Mason Street. This stage is anticipated to take approximately eight weeks.

**Mailboxes:**
The mailboxes located on CTH XX (Bellevue Street) will be temporarily removed during construction. This work will be completed by Brown County staff at no cost to the property owners.
Temporary mailboxes will be set up at the following locations:

<table>
